Section 1 Hybrid IP-Based VoIP Telephony Solution

1.1 Minimum System Technical Requirements

In addition to other specifications set forth herein, the proposed solution must meet the following minimum requirements:

Asset management and protection, ensuring the capital investment provides flexibility in adapting future changes in technology. The solution must

- Support deployment in a vendor-neutral network infrastructure
- Adhere to IP standards
- Provide a secure, centrally hosted/managed solution to reduce complexity and costs
- Insure license based, cost-effective growth through a scalable architecture
- Support integration with current infrastructures as well as provide interfaces to legacy devices via industry standards
- Provide a common interface for managing endpoint client configurations
 - Use the same communications hardware and software nationally, adjusted as necessary for local regulations and operating conditions

APPOINTMENT OF SERVICE PROVIDER TO SUPPLY, DELIVERY AND INSTALLATION OF THE TELEPHONE SYSTEM ON A 36 MONTHS LEASE CONTRACT.

- **Hybrid IP-Based VoIP Solution:** The proposed system and components must be an industry standard, IP-based solution. The proposed system must use IP as the method of session initiation for calling activity and support IP clients. The system must not rely on the Dr Pixley Ka Isaka Seme Local Municipality network infrastructure to perform the switching required to make call connections. The Dr Pixley Ka Isaka Seme Local Municipality will require solutions that rely on both TDM switching matrix as well as IP-Based support to perform these functions (e.g., Hybrid TDM/IP solutions).
- **Centralized Call Control, Applications and Management:** The proposed system should constitute a single system design with centralized call control processors at the headquarter location (i.e., data center). Applications, including management solutions, should also be centralized at the headquarter location. All end users will have access to all common system resources, features and applications. Administrators should be able to easily perform necessary Moves, Adds and Changes (MAC), as well as maintenance activity, from headquarter location, as well as remotely, as may be required.
- **Single System Image:** The proposed system must provide a single system image across all locations and users (e.g., dial plan, station/system feature access, management, etc.). The system should be able to grow to 250 Users without hardware replacements.

Bidder should confirm that the solution meets the minimum requirements set forth above and include a brief overview of how the proposed solution meets these requirements. Bidder should clearly state any areas of non-compliance.

1.2 System Architecture

1.2.1 Host

Provide a description of the proposed system's hardware and software architecture. Include, at a minimum, the following information:

- System Capability and Architecture
- Confirm that the solution is IP-based (e.g., supports and IP registration, call setup, control and call teardown)
- Confirm the System supports an integrated Hybrid design (e.g. Analogue, Digital, SIP, IP, Fax device support)

1.2.2 LAN/WAN Requirements

The Dr Pixley Ka Isaka Seme Local Municipality requires a solution that can interoperate over industry standard infrastructures. Utilization of the existing network infrastructure is desired; however remote WAN infrastructure should form part of the bidder's solution design. Infrastructure changes to the existing network infrastructure should be included by the bidder where required to provide high quality voice service to users or to ensure reliability, including but not limited to remote sites.

Please confirm that solution utilizes industry standard network infrastructures and protocols and does not require data equipment from a specific vendor.

1.3 Public and Private Network Requirements

1.3.1 PSTN Access Requirements

The proposed solution must support for both traditional TDM circuits, as well as IP trunking support. The Dr Pixley Ka Isaka Seme Local Municipality requires the latitude to be able to take advantage of either interface to the PSTN based on specific location requirements. Please confirm that solution supports the ability to deploy either access at any site and provide a brief description of how various accesses are supported (e.g., analog/PRI/T1 gateways available, how IP trunking is supported, etc.).

1.3.2 Private Network Requirements

The proposed solution must provide a true single system image across locations, including dialing between all stations, feature transparency across all locations and centralized systems management using a single unified database. Bidder should confirm compliance and briefly describe how the proposed system connects multiple remote sites in a private network design arrangement with single system image

1.4 Industry Standards Support

1.4.1 Industry Standard QoS Support

Implementation of systems that support industry standards for QoS, such as 802.1p, 802.1Q and DiffServ (differentiated services) is vital. Proposed solutions should comply with these standards.

1.5 Maximum Capacities and Growth

1.5.1 Scalability and Growth

The proposed system must accommodate growth requirements at the host and other sites. Bidder should describe what is required to expand the proposed system meet growth requirements beyond the proposed configuration. Include in your description how the system scales to support up to 250 users with the call control servers proposed. If additional servers are required, please state additional servers required to meet the capacity stated.

1.6.1 End-User Features

Bidder should complete the following end-user feature table. In the Comply column, state whether the feature is supported. ("Y" = Yes and "N" = No).

FORM I: CERTIFICATE OF INDEPENDENT BID DETERMINATION

APPOINTMENT OF SERVICE PROVIDER TO SUPPLY, DELIVERY AND INSTALLATION OF THE TELEPHONE SYSTEM ON A 36 MONTHS LEASE CONTRACT.

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging) ² Collusive bidding is a pe se prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a) take all reasonable steps to prevent such abuse;
 - b) reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c) cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹Includes price quotations, advertised competitive bids, limited bids and offers.

²Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

- R1t, R2t = Index figure obtained from new index (depends on the number of factors used).
- R1o, R2o = Index figure at time of bidding.
- VPt = 15% of the original bid price. This portion of the bid price remains firm i.e. it is not subject to any price escalations

PRICING INSTRUCTIONS

- 1 The General Conditions of Contract, the Contract Data, the Specifications (including the Project Specifications) and the Drawings shall be read in conjunction with the Bill of Quantities.
- 2 The Bill comprises items covering the Contractor's profit and costs of general liabilities and of the construction of Temporary and Permanent Works.

Although the Bidder is at liberty to insert a rate of his own choosing for each item in the Bill, he should note the fact that the Contractor is entitled, under various circumstances, to payment for additional work carried out.

Clause 8 of each Standardized Specification, and the measurement and payment clause of each Particular Specification, read together with the relevant clauses of the Project Specifications, all set out which ancillary or associated activities are included in the rates for the specified operations.

- 3 Descriptions in the Bill of Quantities are abbreviated and may differ from those in the Standardized and Project Specifications. No consideration will be given to any claim by the Company submitted on such a basis. Should any requirement of the measurement and payment clause of the appropriate Standardized or Project Specification(s) be contrary to the terms of the Bill the requirement of the appropriate Standardized, Project, or Particular Specification as the case may be, shall prevail.
- 4 The amounts and rates to be inserted in the Bill of Quantities shall be the full inclusive amounts to the Employer for the work described under the several items. Such amounts shall cover all the costs and expenses that may be required in and for the **provision and hosting of the telephones systems**
- 5 and shall cover the costs of all general risks, profits, taxes (but excluding value-added tax), liabilities and obligations set forth or implied in the documents on which the Bid is based.
- 6 The quantities set out in the schedule of quantities are only approximate quantities. The

quantities of work finally accepted and certified for payment, and not the quantities given in the schedule of quantities, will be used to determine payments to the contractor.

- 7 An amount or rate shall be entered against each item in the Bill of Quantities, whether or not quantities are stated. An item against which no amount or rate is entered will be considered to be covered by the other amounts or rates in the Bill.

The Bidder shall also fill in a rate against the items where the words "rate only" appear in the amount column. Although no work is foreseen under these items and no quantities are consequently given in the quantity column, the stated rates shall apply should work under these items actually be required.

Should the Bidder group a number of items together and bid one sum for such group of items, the single stated sum shall apply to that group of items and not to each individual item, or should he indicate against any item that full compensation for such item has been included in another item, the rate for the item included in another item shall be deemed to be nil. The stated rates, prices and sums shall, subject only to the provisions of the Conditions of Contract, remain valid irrespective of any change in the quantities during the execution of the Contract.

Rates quoted are fixed and quoted in ZAR currency; and shall not in any way be affected by rand/dollar exchange rate or any currency.

- 8 The quantities of work as measured and accepted and certified for payment in accordance with the Conditions of Contract, and not the quantities stated in the Bill of Quantities, will be used to determine payments to the Contractor. The validity of the Contract shall in no way be affected by differences between the quantities in the Bill of Quantities and the quantities certified for payment.
- 9 For the purposes of this Bill of Quantities, the following words shall have the meanings hereby assigned to them:

Unit: The unit of measurement for each item of work as defined in the Standardized, Project or Particular Specifications

Quantity: The number of units of work for each item

Rate: The payment per unit of work at which the Bidder bids to do the work. Should be quoted in ZAR currency only

Amount: The quantity of an item multiplied by the bided rate of the (same) item. Should be quoted in ZAR currency only

Sum: An amount bided for an item, the extent of which is described in the Bill of Quantities, the Specifications or elsewhere, but of which the quantity of work is not measured in units, should be quoted in ZAR currency only.

1. The units of measurement indicated in the Bill of quantities are metric units. The following abbreviation may appear in the Bill of Quantities.

% = Percentage
